KITSAP ENVIRONMENTAL COALITION  
**PRESENTS**

## *Growing Healthy Soil to Feed the World*

In the documentary "**Into the Soil**," we follow Brigid LeFevre, who runs a community-supported agriculture operation (CSO) in Järna, Sweden. The members support this regenerative agriculture operation with money or hands-on help in the garden.

Anne Biklé and David Montgomery explain the science behind creating healthy soil in "**Got Dirt? Get Soil!**"

And in "**The Conversation**" article, Montgomery dispels farming myths, and explains how planting a diverse blend of crops and cover crops, and not tilling, helps promote soil health. **Learn more.**
